Curriculum Description

This course covers the fundamentals of computer and mobile device hardware and software, and advanced concepts such as security, networking, and the responsibilities of an IT professional. Students who complete this course will be able to describe the internal components of a computer, assemble a computer, install operating systems, and troubleshoot them using software tools and diagnostics. Students will also be able to connect to the Internet and share resources in a networked environment. New topics in this version include DNS records, spam management, virtual LAN (VLAN), and privacy and gaming. Operating System Upgrades, Windows Configuration, and IT Professional knowledge areas have been greatly expanded.

Cisco Packet Tracer activities are designed for use with Packet Tracer 8.2 or later. The latest Packet Tracer version is strongly recommended.

Curriculum Objectives

The goal of this course is to introduce the student to computer hardware and software, as well as operating systems, networking concepts, mobile devices, IT security, and troubleshooting. Minimum System Requirements

For the best learning experience, we recommend a typical class size of 12 to 15 students and a ratio of one Lab PC per student. At most, two students can share one Lab PC for the hands-on labs. Some lab activities require the student Lab PCs to be connected to a local network.

The student Lab PCs will be in various states of assembly and repair and therefore are not suitable for viewing the curriculum.

Lab PC Hardware Requirements

In order to be able to implement the different topologies that are used in the lab exercises of the ITE curricula, Academies teaching the course will require the following equipment (at a minimum):

- Windows 10 or Windows 11 (course will focus on Windows 10)
- For OS update labs, PCs with Windows 7, 8, or 10 for update to Windows.
- 1 PC case with a minimum 300W power supply
- 1 PCI, PCIe, or AGP-compatible motherboard
- Intel or AMD CPU, 1 gigahertz (GHz) or faster with support for PAE, NX, and SSE2 or System on a Chip (SoC)
- 1 CPU heat sink and cooling fan
- 1 gigabyte (GB) RAM (32-bit) or 2 GB RAM (64-bit) (1 X 1GB or 2 X 1GB suggested)

Some labs will require one module of RAM to be uninstalled or the simulation of a faulty module for troubleshooting purposes.

- 32 GB hard drive (minimum); 80 GB or more (recommended)
- The computer must support a full installation of Windows and two additional partitions of the same size
- 1 DVD-ROM (minimum), DVD-R, or BD/BD-R
- 1 Ethernet card (If the motherboard does not have an Ethernet port)
- 1 Wireless network adapter (compatible with the wireless router)
- 1 PCI, PCIe (recommended), or AGP video card; DirectX 9 or later graphics device with WDDM 1.0 driver
- Cables to connect HDD/CD (Quantities vary)
- 1 Mouse
- 1 Keyboard
- 1 XGA (1024 X 768) or higher-resolution video monitor

Lab PC Software Requirements

IT Essentials 8.0 content focuses on Microsoft Windows 10. Microsoft offers discount programs for academic institutions to purchase software at a reduced cost. Please visit the Microsoft website for your country or region to learn more.

Lab PC Repair Tools

The computer toolkit should include the following tools:

- Power supply tester
- Wire cutters
- RJ-45 Crimpers
- Cable strippers
- Modular cable tester
- Standard technician toolkit
- Network Loop back plugs (optional)

Additional Required Lab Equipment

In addition to the equipment specified above, the ITE network topologies require the use of the following equipment and accessories:

- 1 Internet connection for Internet searches and driver downloads (this could be the instructor's workstation)
- 1 printer or integrated printer/scanner/copier for the class to share
