Networking Ethics

Ethical emotional networking ***helps people see why they need to be ethical in a situation, as opposed to doing something because they know it is a rule****. Virtuous Networking. Virtuous networking consists of acting in good faith, sharing honest goals, and participating in legitimate activities.*

Future of networking

The network is the foundation of modern businesses and has become more critical since the pandemic. Constant innovation and a massive increase in data usage will see the network looking very different from 2025.
