Explore career-advancing possibilities

The pharmaceutical industry relies on data to successfully execute clinical trials that have endless potential for medical advancement. With the heaps of data comes a need for talented and skillful programmers. Are you intrigued?

Our new training program, in partnership with OCS Consulting, combines coursework and hands-on learning for you or your team to gain valuable clinical research theory and data analysis skills.

What's it all about? The academy offers three tracks based on career aspirations:

• SAS Clinical Programming Foundation
• SAS Clinical Data Management and Analysis
• SAS Certified Clinical Programmer

SAS certification credentials are globally recognized. Don't miss out on this opportunity!

OCS Life Sciences

Who is SAS?

SAS is the world's leader in analytics. But what does that mean, exactly?

It means we turn huge amounts of complex data into knowledge you can use. And for more than four decades, we've been doing it better than anyone.

With SAS, you can apply the most advanced analytics, business intelligence, data management and AI solutions to your toughest business problems.
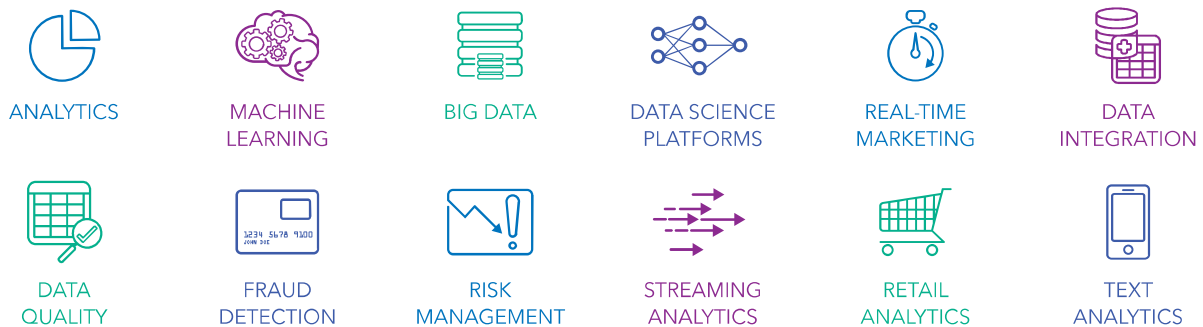

Technology has changed. And so have we.

The SAS® Platform integrates with open source technologies.

- ✔ Programming languages such as Python and R.
- ✔ Data frameworks such as Hadoop.
- ✔ Changing physical and virtual hardware environments.
- ✔ Can deploy in all major clouds.

What does SAS do?

We empower and inspire our customers with the most trusted analytics.

Analysts rank SAS as a leader in:

ANALYTICS	MACHINE LEARNING	BIG DATA	DATA SCIENCE PLATFORMS	REAL-TIME MARKETING	DATA INTEGRATION
DATA QUALITY	FRAUD DETECTION	RISK MANAGEMENT	STREAMING ANALYTICS	RETAIL ANALYTICS	TEXT ANALYTICS

92 of the top 100 companies
ON THE 2018 FORTUNE 1000 LIST ARE SAS CUSTOMERS.

Consistently recognized
as a
WORLD-CLASS WORKPLACE IN TECHNOLOGY
and a
BEST PLACE TO WORK FOR GIVING BACK
